

SELÇUK KOYUNCU

Full Stack Developer | Next.js & TypeScript | End-to-End Web Application Development

Ankara, Türkiye | +90 544 203 06 62 | selcuk_kyncu_06@hotmail.com

Portfolio: selcukkoyuncu.com.tr | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer focused on building modern, production-ready web applications end to end.

Experienced across the complete development lifecycle—from requirements and UI/UX implementation to frontend and backend development, database integration, authentication and authorization, admin dashboards, testing-oriented development, Git-based version control and production deployment.

Hands-on experience with Next.js, React, TypeScript, Tailwind CSS, Node.js, MongoDB, PostgreSQL, Prisma and automated testing with Vitest. Recently delivered LUXEA, a live multilingual premium-accessories web application with dynamic product/category experiences, order tracking, localized content and an AI Concierge interface.

Combines software development capability with 12+ years of European Union-funded project management experience, including stakeholder coordination, planning, reporting and multi-phase delivery.

This background supports a structured approach to turning business requirements into maintainable digital products and delivering projects from concept to deployment.

TECHNICAL SKILLS

Frontend: Next.js, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Next.js API Routes / Route Handlers, REST APIs, Server Actions, Authentication & Authorization, Server-side application logic

Data & Caching: PostgreSQL, Prisma ORM, MongoDB, Next.js Cache/Revalidation

Testing: Vitest, Unit Testing, Automated Testing Fundamentals

UI / UX: Responsive Design, Mobile-First Development, Framer Motion, GSAP, UI/UX Principles

Application Features: Multilingual Interfaces, Admin Panels, CMS/CRUD Workflows, Order & Stock Workflows, Media Management

Tools & Deployment: Git, GitHub, Vercel, VS Code

Development Scope: End-to-End Web Development, Database Integration, Production Deployment

SELECTED SOFTWARE PROJECTS

LUXEA — Multilingual Premium Accessories & Order Management Platform | [Live Website](#)

Technologies: Next.js, React, TypeScript, Prisma ORM, Tailwind CSS, Next.js Route Handlers

- Built and launched a production web application for a premium accessories brand, combining a luxury-focused responsive storefront with database-backed product, category and order workflows.
- Implemented multilingual experiences for Turkish, English and Arabic, including localized product-management fields and locale-specific storefront navigation.
- Developed dynamic product and category management with pricing, stock, ordering, colors, multiple images, featured/new/active states and reusable administrative workflows.
- Implemented server-side order validation and inventory handling, including transactional stock updates, generated order/tracking numbers, order status history and customer-facing order tracking.
- Designed an AI Concierge interface for product, order and shipping assistance and integrated the application flow with an AI response service.
- Delivered the application to production and made it publicly accessible as a live portfolio case study.

Full-Stack E-Commerce Web Application

Technologies: Next.js, React, TypeScript, MongoDB, Tailwind CSS, Zustand

- Developed the application end to end, covering responsive storefront UI, application logic, database integration and production deployment.
- Implemented authentication, shopping cart, favorites, checkout flows and administrative product/order management.
- Built reusable components and responsive interfaces for desktop and mobile experiences.
- Managed source control with Git/GitHub and deployed the production application using Vercel.

Content-Managed Corporate & Service Websites

Technologies: Next.js, TypeScript/JavaScript, Tailwind CSS, MongoDB, Framer Motion / GSAP

- Built multiple production-style websites for construction, legal, logistics, transportation and professional service use cases.
- Developed responsive page structures, interactive interfaces, multilingual experiences and reusable component systems.
- Implemented admin/CMS functionality, CRUD workflows, contact forms and database-backed content where required.

Appointment, Blog & Admin Management Platform

Technologies: Next.js, MongoDB, Node.js, Tailwind CSS

- Developed an end-to-end professional services platform with appointment booking, blog management, contact messaging and an admin dashboard.
- Implemented database-backed workflows, administrative statistics, content management and responsive user interfaces.

Architecture & Construction CMS Platform

Technologies: Next.js, MongoDB, Tailwind CSS, Cloudinary

- Built a bilingual corporate platform with project and journal content management, featured content and secure admin functionality.
- Integrated database-driven CRUD operations, media management and production deployment workflows.

Additional live examples and portfolio projects: selcukkoyuncu.com.tr

PROFESSIONAL EXPERIENCE

European Union Project Manager | 12+ Years

- Managed and coordinated European Union-funded projects from planning through implementation, reporting and completion.
- Led stakeholder communication, operational planning, reporting processes and multidisciplinary project workflows.
- Coordinated multi-phase delivery in international environments, strengthening leadership, analytical thinking and problem-solving skills.
- Applied structured project execution, prioritization and risk awareness—skills directly transferable to software product delivery.

EDUCATION

Bachelor's Degree in Mathematics (English), Abant İzzet Baysal University — 2012

LANGUAGES

Turkish — Native | English — Advanced / Fluent
